About ITCA

IT Certification Academy (ITCA) is a registered and accredited private IT education and training institution in South Africa. Since its inception in 1999, many of its graduates have excelled in their chosen career fields and currently hold senior positions.

In addition to its SETA-accredited and NQF-registered programmes and qualifications, ITCA provides a diverse selection of Soft Skills and Skills Development courses, particularly for the corporate sector, private companies, government and non-government entities, and employed professionals.
To ensure high standards in terms of quality of provision, relevance, and responsiveness to industry and societal needs, our programmes and courses are quality-assured and certified by, and delivered in partnership and collaboration with, both local and international industry-leading training partners and certification agencies, including Microsoft, CompTIA, Certiport, SACE, Cisco, Pearson VUE, QCTO, and MICT SETA.

In addition, ITCA collaborates and maintains strategic partnerships with several stakeholders, public and private organisations, and educational institutions to ensure the relevance and responsiveness of its programme and course content to industry and societal needs.

ITCA works with globally recognised certification bodies and industry partners to ensure students receive qualifications that are respected worldwide.
